SUPPLEMENTAL INSPECTION REMARKS

Permit No.: 18 031 H

The following remarks supplement the inspection report of: Metamora Township High School cafeteria
(Establishment Name)

Date: 12 February 2018

Item	Code	Section	Inspection Remarks	Correct by
		FYI	HAZARD ANALYSIS CRITICAL CONTROL POINT	
			- Keep potentially hazardous food requiring time/temperature controls for safety out of the temperature danger zone of 41° F – 135° F [use a clean and sanitized food temperature measuring device with metal-stem to monitor internal food temperatures]	
			- Wash hands frequently at hand sink, especially before using gloves – double hand washing required after using the restroom	
			- Recommend continued documenting temperatures of refrigeration units, freezing units, and also documenting temperatures of hot-holding units, internal food temperatures, dishwasher temperatures, sanitizer concentrations, etc., on a log sheet	
			- Chlorine: 50-100 ppm at 3 rd compartment of sink, immersion for 10 seconds; 75° F 100-200 ppm for swabbing, moist-wipe cloth, spray bottle; 75° F - Quaternary ammonium: 200 ppm at 3 rd compartment sink, immersion--30 seconds; 75° F 200 ppm for swabbing, moist-wipe cloth, spray bottle; 75° F - Heat: final rinse -- dishwasher = 180° F or above Keep bottles/buckets/containers labeled and properly stored	
			- Make sure all containers of food are properly labeled w/ <u>name</u> and <u>date & time</u> of opening of package, in addition to the <u>date & time</u> when the food was placed into the container; discard PHF under refrigeration after a maximum of 7 days	
			- Pre-chill containers in freezing or refrigeration units that will store potentially hazardous foods for cold-holding.	
			- Pre-heat warming units in advance of placing food in them to ensure potentially hazardous food maintains required minimum internal temperature
